

AIRBIOTICS™

CLEANING MADE EASY SO YOU CAN BREATHE EASY

We believe that a balanced and truly clean indoor environment is essential to your health and well-being. This is why we have developed our life-enhancing product line that focuses not only on the air we breathe indoors, but also the surfaces we come in contact with daily.

Our complete product line offers a natural solution that is superior to other green products and is a much healthier alternative to chemical based solutions. Our products create a noticeably clean and protected indoor environment – one that is safe, healthy, clean and balanced for you, your loved ones and your pets.

The Cleaning Services Industry is over **\$46 Billion**

100% of users feel Airbotics product line is easy to use

The avg. American household spends **\$771** a year on cleaning products

67% of users reported allergy symptoms were improved after using Airbotics

100% of users said they would recommend an All Purpose Cleaner regimen to their friends and family

A BALANCED LIFE STARTS WITH A BALANCED ENVIRONMENT

Wish you could capture that "Ahh" fresh feeling after cleaning your home and make it last longer? With Airbiotics, you can! Discover how you can spend less time cleaning and more time enjoying life with the power of probiotics.

Probiotics means "for life" and at Airbiotics, not only do we want to live, we want to live well. We believe everyone deserves a life full of health, wellness, joy and positive energy. This is why all Airbiotics products use the power of probiotics, a type of healthy bacteria that enhances our quality of life by protecting us from harmful bacteria. Most people are familiar with internal probiotics which are plant-based, like that found in yogurt. These probiotics use good bacteria to bring your body and digestive system back into balance by attacking bad bacteria that dwell in your gut. The soil-based probiotics in Airbiotics are formulated to survive externally and have the same protective qualities!

What causes your indoor environment to become unbalanced? Biofilm...and it is everywhere! On counters, toilets, faucets, floors, toys and even our skin and sinuses – and harmful bacteria thrive in it. So, for something to be truly clean, it must be free of biofilm. Common household cleaners are ineffective at removing biofilm because they kill the healthy along with the unhealthy bacteria.

When we clean we usually turn to bleach and disinfectants that contain harsh chemicals and strong fragrances because we associate clean with how something looks and smells. But oftentimes, fragrances just mask the smell rather than removing it.

THINGS THAT LOVE US

PEOPLE WHO LOVE US

PUT THE POWER OF PROBIOTICS TO WORK FOR YOU

Airbotics products are unlike your everyday cleaners, instead of killing all bacteria, Airbotics leaves a protective shield against unhealthy bacteria, preventing it from coming back for up to 3 days. Our revolutionary formula, StaBiotics™, stops odors and dirt in its tracks by harnessing the natural power of external probiotics. This creates a truly clean indoor environment that is free of biofilm.

Airbotics products infuse external probiotics throughout our indoor environments creating an ultimate clean that benefits our health.
