To Whom It May Concern,

I am writing this personal recommendation letter as an owner and operator of multiple Gracie Academies throughout California. Additionally, my brother Renner and I both oversee over 100 schools around the world while growing thousands of dedicated students who are on the journey through GracieUniversity.com

Since February 2016, my gyms have had the opportunity to test and use Airbiotics' All Purpose Cleaner and StaBiotic Mist Spray to clean the bathrooms, mats, windows, offices and all common areas.

The decision to switch to Airbiotics was easy after we tested the levels of bacteria and cleanliness against other well-known chemical cleaners using an ATP Meter. In short, Airbiotics was able to remove dirt, odors and bacteria for hours and days longer than the standard chemical cleaners. Additionally, by using Airbiotics we have reduced the number of products used in our gyms and reduced operating costs to our maintenance budget.

On a personal note, since I learned these products are Green Clean Certified, Food Grade and Allergy Free, my wife and I have enjoyed using Airbiotics at home and feel good about using safer products around our children.

For business owners and individuals who are looking for a high performance cleaning product without having to sacrifice safety or price, Airbiotics is a perfect fit.

Sincerely,

Ryron Gracie Owner/Operator Gracie Academy
